Professional Summary

Computer Application graduate student with knowledge in Java, PHP, MySQL and a solid foundation in problem-solving and object-oriented programming. Eager to learn modern technologies, enhance practical development skills, and contribute to real-world software solutions. Seeking an internship opportunity to apply technical skills and contribute to impactful real-world projects.

Education

Master of Computer Applications (MCA)

Parul University, Vadodara

Jul 2025 – Present

Pursuing

Bachelor of Computer Applications (BCA)

Veer Narmad South Gujarat University, Surat

Jun 2022 – Apr 2025

CGPA: 8.45/10

Technical Skills

Languages: Java, Python, HTML, CSS, JavaScript, React, PHP, SQL

Backend & Frameworks: FAST API (Beginner), JDBC, RESTful API, MySQL

Tools & Platforms: Git, Postman, VS Code

Projects

Government Scheme Finder

[\(GitHub\)](#)

- **Tech Stack:** React.js, Node.js, Express.js, REST API, SQLite
- Built a government scheme discovery platform by implementing eligibility-based search and filtering, enabling quick scheme identification.
- Improved information retrieval by developing responsive interfaces, backend APIs, and SQLite database integration, ensuring efficient access to schemes.

Healthcare Appointment System

[\(GitHub\)](#)

- **Tech Stack:** PHP, HTML, CSS, Bootstrap, Chart.js, DataTables.js, MySQL
- Built a healthcare appointment system by developing role-based modules in PHP and MySQL, improving appointment management.
- Simplified patient scheduling by implementing secure booking and authentication, reducing manual effort.
- Improved data management by developing CRUD operations for patients, doctors, and appointments, ensuring organized records.

Achievements

Vadodara Hackathon 3.0 | Parul University

[\(Certificate\)](#)

- Participated in a team-based Smart India Hackathon focused on problem solving.
- Designed and developed a Timetable Scheduling System leveraging intelligent scheduling.

Think & Build Spark Competition – Web Development | Vivekanand College

[\(Certificate\)](#)

- Developed a secure online voting system during a university-level web development competition.
- Achieved 2nd rank at the university level, competing against teams from multiple colleges.

Competitive Programming

- Solved 300+ coding problems on LeetCode.

[\(Profile\)](#)

Certifications

Deloitte Australia – Technology Job Simulation (Forage)

[\(Certificate\)](#)

- Completed a technology-focused job simulation involving development and coding tasks.
- Prepared a structured proposal for designing a data visualization dashboard.
